Welcoming the Future Leaders of Impact and Change

Technology drives the reinvention of the business world. Not only improving lives, technology also empowering people and transforming nation through innovation.

With the ease of communication in today’s world, the global society invites everyone to become a part of it, to join hands and work together solving the world’s problems and advancing as a highly innovative and diverse global society. We are a community of global scholars; our mission is to create a global state of mind. Now is your turn to take a leap and embrace the interconnected future through our five excellence learning experiences.
ABOUT BINUS UNIVERSITY INTERNATIONAL

As the global society comes together to work hand in hand towards a better future, programs in education have been modified to answer the new challenges that come with it. In 2001, BINA NUSANTARA Foundation built a new education facility in Senayan, a prestigious commercial center in the heart of Jakarta that allows for easy access and other advantages.

The campus is now known as BINUS University International, a sustainable centre of knowledge and learning - incubators of innovation that can flexibly respond to the fast changing demands of industry and society. BINUS UNIVERSITY INTERNATIONAL is a higher institution of world-class education that excels with five learning experiences that include:

1. Hybrid Modular Curriculum
2. Problem Based Learning
3. Real World Experience
4. Innovative & Entrepreneurial Mindset
5. Global Career

At BINUS UNIVERSITY INTERNATIONAL, students are put at the heart of global learning in a student-centered environment. Not only encouraged to go through the path of self-discovery, students are inspired to discover and create their own solutions to answer any given challenges and become global graduates with innovative mindsets to help them thrive.

We are pleased to welcome you all to BINUS UNIVERSITY INTERNATIONAL and delighted that you have shown your interest in BINUS UNIVERSITY INTERNATIONAL to pursue your bachelor degree, as it will mark the beginning of your journey of educational excellence. We are passionate in fostering and transforming our graduates to become more global, more innovative, and better individuals. Currently, 50% of our new graduates are accepted in multinational companies or prominent Indonesian companies. As of this year’s cohort, they will gain the required international experience through double degrees, studying abroad, immersion, international projects, or overseas internships. Not only that, we have just launched our Center for Innovation and Entrepreneurship and a new Hybrid-Modular Curriculum. All of this beyond classroom experience will make you more confident when you graduate, empowering you to become the future leaders.

“With this, we wish you all the best on your journey through university life!”

Firdaus A. Alamsjah, Ph.D
Executive Dean & Provost
As the world transforms, so should education. It is crucial for the field of education to keep on transforming and evolving in order to elevate many students to new heights of knowledge by introducing them to new insights and skills, fostering them in a creative competition for relevance and excellence. Through extensive research and strategy, BINUS UNIVERSITY INTERNATIONAL has launched its new five learning experiences that put students at the center of learning and bring them into the new world of creative and self-discovered education.
What is Hybrid-Modular Curriculum?

The Hybrid-modular Curriculum is the new curriculum of BINUS UNIVERSITY INTERNATIONAL that intends to create high quality global graduates with innovative mindset through programs with relevant applications. In this curriculum, students are at the very center of learning. Instead of dwelling heavily on textbooks and studying for regular exams, BINUSIAN are encouraged to develop a sense of self-discovery where they uncover and even create their own solutions to answer any given real-life challenge of their chosen fields. With this curriculum, the students are free to explore many aspects of their chosen major. This will help them to develop innovative mindsets geared towards becoming innovative, able leaders who are skilled in their fields and dedicated to pursuing creative and innovative solutions. Real-world experience is also provided through the 3+1 program, where students take one year off campus to gain work experience through internships in prestigious companies abroad or within the country, equipping students with experiences that help them get in touch with who they want to be.
BINUS UNIVERSITY INTERNATIONAL started implementing 3+1 curriculum for all undergraduate programs, which allows students to have a one-year enrichment program. The program consists of 2 semesters with 16 credit units each. Students may choose 5 tracks for each semester, namely:

1. HYBRID MODULAR CURRICULUM
2. Internship Track
3. Entrepreneurship Track
4. Community Development Track
5. Research Track
6. Study Abroad Track

By the end of each semester, each student will submit an enrichment report and several papers related to technical competencies in his/her disciplines and soft skills.
LEARNING EXPERIENCE

Problem based learning

Fostering your global future through problem based learning

Bright young minds learn more and faster in an environment where their imaginations and creativities are encouraged. In BINUS UNIVERSITY INTERNATIONAL, students are introduced to unique approach in education through problem based learning where students can have the flexibility to use their knowledge and creativity to build innovative creations based on what they have learned.
Real World Experience

Fostering real world experience in the co-working space

Students will be introduced to co-working space in lieu of traditional classrooms. The world is their classroom. Instead of spending most of time sitting and listening to lectures, students will be fostered to cultivate real world experience by collaborating with their peers to finish tangible projects and applying their knowledge to relevant experience. Real world experience is also provided through the 3+1 program, where students take one year off-campus to gain work experience through internships in prestigious companies abroad or within the country.
Innovative and Entrepreneurial Capabilities

Catalyzing innovative and entrepreneurial inborn potential through CIDER™

Do you know that changes in technology, consumer behavior and needs represent the main challenge facing tomorrow’s leaders? Millennials, as the future leaders, need tailor-made attention to be ready to take on these opportunities. Therefore, students need a fostering environment, which helps them to bring out their personal skills of communication, teamwork, decision-making and leadership, and the integrity and character. Having understood this need, we have redesigned the innovation and entrepreneurship campus ecosystem through CIDER (Catalyst for Innovation, Design, Entrepreneurship & Research).

We are catalyzing through four dimensions:

**Promoting Creativity in Learning**
Creativity is an essential aspect for learning. Through CIDER™, students can experience an innovative educational space that acknowledges broad diversity. Collaboration with diversity allows our students to develop their creative capacity. We have designed several customized learning packages within our curriculum to unleash their creativity through the right mindset and process.

**Engaging Multidisciplinary Passionate Students**
Through simple collaboration, multidisciplinary students can accomplish more by teaming. We have been initiating this kind of relationship in the form of communities. Creativity thrives on diversity, tension, sharing, and collaboration, so we designed our environment by engaging multidisciplinary in a sustained culture of innovation and facilitating the development of stimulating learning practices.

**The Transforming Power of Creative Spaces**
People demonstrate creative behavior in creative settings. So we designed a creative environment and atmosphere to inspire students the importance of teamwork and experience innovation. Providing them with the right tools and equipment also plays a big role in promoting creative behavior.

**Connecting with Global Ecosystem**
Collaboration is one of our ways to design the entire experience for students to catalyze their innovative and entrepreneurial potential. We connect and collaborate with various stakeholders for global ecosystem, such as incubators, accelerators, entrepreneurs, venture capitalists, business coaches, mentors, public and private companies around the world.
Global Career

Fostering skills and confidence for successful careers in a global society

In a world of increasingly global competition, how do we ensure to remain competitive? In BINUS UNIVERSITY INTERNATIONAL, students will be prepared to build a career that spans internationally not only for personal success, but also to create innovative and knowledgeable future national leaders.

Preparing a Globally Competent Workforce

At BINUS UNIVERSITY INTERNATIONAL, the approach to education is one that gives the opportunities for students not to only thrive nationally, but also internationally. Students will be prepared to prosper in their chosen global workplace with all the ingredients for international success beginning from the thinking, work culture, and even the confidence to compete in their future global careers.

Global Experience

- Collaboration with International Students

Global Recognition

- Double Degree
- Study Abroad
- Overseas Internship
- International Project Collaboration

Global Diversity

- International Students from 34 countries
- International Faculty Members
- 100% Internationally Qualified Faculty Members

2 out of 3 Students Work at Global Companies

Readiness for Future Global Career
Paths to Empowerment

There is no one certain way to solve a problem, just like no one particular major that answers all the world’s challenges. At BINUS UNIVERSITY INTERNATIONAL, students who major in different areas of expertise are prepared to answer different sets of challenges, whether within the national or international perspective. Students are provided with six different majors from two faculties, all enhanced with the five excellent learning experiences and prestigious university partners that will help prepare them to thrive in their global careers.

**Student Outcomes**

BINUS UNIVERSITY INTERNATIONAL aims to produce graduates who possess:

- Ethical, social, and professional conduct
- Creativity & Innovation competencies
- Professional English fluency & ICT skills
- Global mindset
- Entrepreneurial skills
- Real world experience
At BINUS UNIVERSITY INTERNATIONAL’s Business Management and Marketing Program, students will work towards honing their business and entrepreneurial skills with a focus on developing business, marketing, and entrepreneurship. The curriculum includes both in-class and out-of-class learning, which cover internship programs in national and multi-national corporations, guest lecture and marketing insight sharing sessions from various industry professionals, 1-year enrichment program, and research thesis, that allow students to be well-prepared to work for multi-national corporations in the global marketplace, or to become creative and innovative entrepreneurs that are ready to answer today’s challenges. The program offers single-degree, double-degree, and master-track programs.

Program Objectives
A. To provide students with cutting edge management knowledge that will enable them to compete globally.
B. To prepare students to apply business management, marketing, and ICT principles required in industrial practices.
C. To provide students with the ability to communicate effectively in the industrial context, both locally and globally.
D. To nurture students to become ethical and professional yet socially aware of business professionals.
E. To prepare students to be creative and innovative in business decision making at the international and local level.

**International Accounting and Finance**

The International Accounting & Finance (IAF) program is the first Indonesian program to be awarded the prestigious international accreditation of EPAS from the European Foundation for Management Development (EFMD) that evaluates the quality and international perspective of higher education systems. It designed to prepare students to become skilled professionals in the accounting and finance areas.

The program allows students to study the knowledge and practical skills of Accounting within international and national contexts. Equipped with ICT (Information and Communication Technology) skills, the program embraces an innovative pedagogical approach that combines theories with real-life application.

In designing its curriculum, the program takes into account input(s) from important stakeholders, namely: the industry, national and international professional organizations, global professional trends, rules from the Indonesian Directorate of Higher Education (DIKTI) and guidance given by BINUS UNIVERSITY INTERNATIONAL. We ensure our graduates are prepared to join the industries with technical as well as soft skills.

**Gatot Soepriyanto, Ph.D., CA, CFE**

Gatot is a senior lecturer in BINUS and also has experienced teaching in overseas, such as in Monash University and Victoria Institute in Australia. Gatot is a Certified Accountant (CA) and Certified Fraud Examiner (CFE). His research focuses on the issues of auditing, corporate tax avoidance and financial statements fraud. He earned his Master and PhD degrees from Monash University, sponsored by the prestigious Australia Awards Scholarship from the Australia Government.

**Jeffrey Suryadi**

It has been an honor for me to be able to study my undergraduate accounting program at BINUS UNIVERSITY INTERNATIONAL. All the lecturers are very helpful and open-minded. Additionally, we do not only learn about theories but also how to apply those theories in the real world. The international accreditation from EPAS-EFMD is also major big validation of this program.

Business Information Systems

In today's businesses, Business Information Systems play a pivotal role. The Business Information Systems program is developed to equip the students with competencies of developing and managing computer technology to support the business world. It is a unique combination of computing knowledge and business skills that has been developed to provide the students with competencies of managing enterprise information systems, cloud based technology, database, programming, business processes, project management and IT (information technology) auditing. Its graduates will possess the skills and insights needed to understand both business processes and the technologies available to support them, they will play an important role in delivering technology solutions to the market place by systematically recognizing and translating business needs into technology based solutions.

Program Objectives
A. To equip students with the latest data science capability and knowledge on technology based solutions.
B. To equip students with various thinking skills in the area of strategic planning and design and analysis for developing innovative technological solutions.
C. To equip students with leadership, entrepreneurial, and ethical professional skills related to the Information System industry and openness and awareness of diversity across cultures.

Faculty of Computing and Media
Communication

At the Bachelor program in Communications at BINUS UNIVERSITY INTERNATIONAL, students will gain extensive theoretical and practical knowledge of the latest and most advanced media tools in getting the message through, as well as social, cultural and ethical knowledge to create responsible communication methods.

In the four-year program, students will develop creative, critical and contextual thinking, as well as social, cultural and media business knowledge and apply it to real world situations through their designated projects. The program offers three streamings: Journalism, Public Relations and Entertainment Communication.

The Bachelor program in Communications of BINUS UNIVERSITY INTERNATIONAL is closely partnered with prestigious universities with highly acclaimed Communications Programs. In addition, students will be able to travel for their studies to a multitude of countries and universities to expand their horizons.

Program Objectives
A. To provide students with social and cultural knowledge, critical thinking and technical skills to produce effective messages to their audience.
B. To prepare students to utilize information communications technologies (ITC) and other new media technologies.
C. To prepare students to produce effective and original communication content in print and digital media.
D. To complement students with leadership and entrepreneurship skills, as well as ethics required to be socially aware and to further innovate digital media communications.
E. To demonstrate capacities for creativity, transformation and contribute continuous improvement in the media industry.

In this fast-moving era, Computer Science has gone beyond the simple use of computer software. With the 3rd wave of computing (Pervasive computing) as the most recent advancement in the computing and technology field, graduates need the ability to understand, create and support applied computing solutions for their own business, their clients, or their employers.

The Computer Science program provides the students with the technical knowledge, the entrepreneurial, and the specialized skills needed to develop and design applications across modern platforms, such as cloud, web, and mobile, in a rapidly changing IT environment.

BINUS UNIVERSITY INTERNATIONAL's Computer Science program is closely partnered with global organizations and prestigious universities with highly acclaimed Computer Science Programs.

Program Objectives
1. Produce reputable professionals with the skills to develop creative and impactful software products and services, including but not limited to computer networks and security and games technology.
2. Produce reputable professionals with a solid foundation of mathematics, algorithms, and principles related to computing that will be needed in problem-solving practice.
3. Equip graduates with communication skills and utilize the latest trends in technology to contribute to the global workplace.
4. Produce reputable professionals with the skills to design and implement various computer networking environments using different security techniques and routing theories to produce secured and robust networks.
5. Produce reputable professionals with the skills to design and develop game applications by combining technology with creative art and design concepts to produce an exceptional game application that is able to run on multi-platform environments.
6. Equip graduates with the key skills (self-management, planning and organizing, team work, problem solving, decision making, initiative and enterprise) and foreign languages as well as using information technology and to be useful in the workplace and society.
A playful environment is an integral part of fostering knowledge. An environment where certain playfulness is in the air will empower students to ignite their highest potential and achieving their goals. At BINUS UNIVERSITY INTERNATIONAL, students are provided with the most extensive and highest quality facilities that will offer them various benefits for their journey of pursuing their bright future from tangible facilities such as co-working spaces and labs to various programs that will help students to thrive.

“One of the prestigious facilities is CIDER PARK, it’s like a dream comes true for me. I have always wanted to join a community, which is creative, innovative, and constructive, like CIDER. Being a part of CIDER is more than an opportunity to grow. I can learn a lot of new and good things in CIDER. Hence, when I leave this campus, I will be a better person and a better entrepreneur.”
Curiosity and creativity are very important parts of human experience and using creative kits & crafts is beneficial for the development of our students' innovative and entrepreneurial capacity. Prototyping through creative kits is a great way for the students to express their innovativeness and explore new materials and ways to put them together.

And there are some other benefits of being 'crafty':

1. Physical benefits
2. Self-regulation skills
3. Practice with decision-making, critical thinking and design thinking
4. Bonding time among team members
5. The experience of creating something new can lead to feelings of well-being and satisfaction.

BIS-Creative Space

BIS (Business Information Systems) in collaboration with CIDER is preparing this Creative Space as a hub to fostering a culture of innovation and entrepreneurship. The space is meant to help students to achieve and unleash their hidden potential by enhancing their learning process. BIS Creative Space can be utilized as a coworking hub to stimulate brainstorming and creative thinking so the learning process will be more fun and engaging.

Student Support Services

• Academic Advisory

Academic Advisory is intended to aid students with various advisories to support their study at BINUS UNIVERSITY INTERNATIONAL that includes:

1. Consultation for academic advice, reports of academic achievements, information to parents, problem solving of academic materials
2. Motivate individually or in groups
3. Advice of courses, suggestions for a study plan

CIDER Kits

Curiosity and creativity are very important parts of human experience and using creative kits & crafts is beneficial for the development of our students' innovative and entrepreneurial capacity. Prototyping through creative kits is a great way for the students to express their innovativeness and explore new materials and ways to put them together.

And there are some other benefits of being 'crafty':

1. Physical benefits
2. Self-regulation skills
3. Practice with decision-making, critical thinking and design thinking
4. Bonding time among team members
5. The experience of creating something new can lead to feelings of well-being and satisfaction.

• Students, Alumni and Global Employability (SAGE)

Consisting of 5 units, SAGE have a commitment to provide various programs that are in student’s knowledges, skills and attitude for their future careers. Several of SAGE’s regular activities are:

1. Career seminars and employment preparation training service
2. Campus hiring and recruitment
3. Leadership training and student organisation involvement
4. International student activities
5. Alumni sharing
6. Community Services
7. Academic and non academic counselling
Students are the key stakeholders in the transformation process; our faculty members and staff are the change agent who will guide them through their journey of transformation.

All the faculty members and staff possess global knowledge and experiences. All of them are chosen from the best people possible in their positions, beginning from the lecturers to other staff behind the scenes. Here is a glimpse of our professional faculty members:

**Global Diversity**

100% internationally qualified faculty members: at least one year overseas, either study or work; otherwise graduated with cum laude.

NTU United Asia Debating Championship 2014 in Nanyang University, Malaysia.

“As a lecturer, my role is always to ensure that I fill up that small piece of the puzzle in my students’ future. From the day our students first come until they graduate and then start their professional journey, they have been equipped with all the knowledge to succeed. We share with them our experience and discuss real business examples that are applicable to any given case. We challenge them to go the extra mile for excellence and at the end of the day, hopefully each of them is ready to be either a professional or an entrepreneur. Whichever they will be, the importance of their contribution to the country’s welfare is the reflection of our mission as educators.”

Dominique Bazefindrandrihina M.A, M.Sc
Senior Faculty Member of International and Accounting Program
